

# QGIS Lessons plugin

Víctor Olaya

Boundless

# Lessons plugin

- A plugin for self-guided lessons within QGIS.
- Lessons are distributed as plugins.
- Additional tools to write lessons.
- <https://github.com/boundlessgeo/qgis-lessons-plugin>

# Creating lessons

- Each lesson is a Python module.
- It contains automated steps and manual steps.
- For non-developers, lessons can be written using YAML files.

# Tester plugin

- Same approach and code base as Lessons plugin.
- Guides tester through test steps and automates tasks.
- Can run fully automated tests.
- Collects results in a test report.
- <https://github.com/boundlessgeo/qgis-tester-plugin>
